Dear  
Editor

Name of the authors:

**Hadijah, Zainuddin, Amal Aqmal, and Didimus K. Banin**

Hereby I would like to submit the manuscript entitled "**Marine Algae formulated feed to the growth rate, survival rate and chemical composition of abalone (*Haliotis squamata*) reared in the marine submersible cage**" to Aquaculture, Aquarium, Conservation & Legislation - International Journal of the Bioflux Society mainly submit to quartile Water Science and Technology (Q3).

This manuscript was not submitted or published to any other journal.

The authors declare that the manuscript is an original paper and contain no plagiarised text. All authors declare that they are not currently affiliated or sponsored by any organization with a direct economic interest in subject of the article. My co-authors have all contributed to this manuscript and approve of this submission.

Regards

Corresponding author

Dear Dr. Hadjah,

This is a message of confirmation regarding the reception of your manuscript **Marine Algae Formulated Feed to The Growth Rate, Survival Rate and Chemical Composition of Abalone (*Haliotis squamata*) Reared in The Marine Submersible Cage**, submitted to our journal AACL Bioflux.

Before starting the editorial process, I must ask you to try to improve the English in the manuscript. I can tell you from experience that if I send the paper like this to the reviewers, in most cases they will reject because of the English. It doesn't have to be perfect English, but it has to be better. Before publishing, we do an English check, but in this phase, you have to improve it. Maybe ask colleagues/friends who know better English. Please do this, and send me the improved manuscript.

Thank you.

For any questions, please contact me.

Please try to keep one message thread (respond/ask with "Reply") for an easier message management.

Thank you for considering our journal.

Best regards,

Tudor Papuc

Editor, Bioflux SRL

2 Juli 2020 16.27

Yes, I have the update.

Your paper is preliminary accepted for publication. Please find attached the preliminary acceptance letter. The final acceptance or rejection will be confirmed after receiving the double-blind peer reviews. You can recommend the second reviewer, if you wish to do so (it would go faster).

After this acceptance you should pay 250 USD for publication (open access).

As the payment and bank transfer may be time consuming you may start the process of payment right now; we will send you the invoice immediately after the payment.

Please let us know when the payment is done (scanned receipt) in order to start the publishing process.

In case the peer-reviews suggest rejection, we will return the payment. The payment will not be returned in case of withdrawal request by authors or simply lack of feedback.

Please note that the Publishing House Policy does not allow to start the manuscript editing prior payment.

Here are the info for payment;  
take care to write correct the details:

*Beneficiary:* Bioflux SRL  
*City:* Cluj-Napoca  
*Country:* Romania, European Union

*SWIFT CODE of the bank:* BTRLRO22

*Account USD:* RO68BTRL01302202L28614XX

*Bank:* BANCA TRANSILVANIA

**Important!** When bank transfer is used to pay a publication fee, please pay attention to which modality of payment you chose! There are three options: Ben, Our, Us.

Use always "Us" option (meaning that all the bank transfer costs are in your concern/ authors support them and not the publisher). If you forgot to mention that and you let the bank to set "Ben" or "Our" options, we receive about 225 usd instead of 250 usd. Such payments are not valid and you need to pay again for the rest of the sum and one more transfer charge. This situation is not desirable.

There is a second method of payment, by Paypal, with credit card. Please let me know if you choose this method and I will redirect you to our colleague which is in charge of this procedure.

Let me know if you need more details.

Thank you for publishing with us!

28 September 2020 03.16

Ok, please find attached the final version. There are 4 more comments to solve. I am detailing here the comments, but they are also present in the paper:

1. There is a percentage on page 2 without any details about what it is.
2. You didn't write the current velocity (where you talked about salinity and temperature).
- 3 and 4: you need to write the full name of Didimus K. Banin (not just the initial K, but the full name that starts with K) and his email address in the text after the references. If he doesn't have an email address, please let me know.

So, please read carefully the manuscript for a final check, and make these corrections with yellow highlight, so I can check them. If you want to add anything else, now would be the last time, because after publication, we cannot make any changes to the manuscript. If you do add anything, please highlight with yellow.

When you send me back the manuscript, please let me know if you agree with the publication. I will publish it in 1-2 days. Also, the publishing date will be one of the first days of September (between 1-10), because there was a problem with the server (that was solved), and we couldn't upload papers, so we need to fill the first days of September.

Thank you,

Best Regards,
