Dear Pak Abdul,

Thank you for the information. We have finished checking the revision. We would like to ask, in the paragraph below, what does Z mean?

Eighth, the coefficient of indirect influence from personality factors to entrepreneurial decisions through the characteristics of entrepreneurs is  $0,254 \times 0,762 = 0,194$ . Because Z of 4,246 is more significant than Z of 1,96 at a significance level of 0,05, the indirect coefficient of 0,194 is significant. The personality factor indirectly significantly affects entrepreneurial decisions through the characteristics of female entrepreneurs in Makassar City. So, H8 is accepted.

Please inform us as soon as possible.
